Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Maxwell.

Maxwell discloses an apparatus for storing energy for subsequent use in electrical or physical power generation, comprising a semi spheric liquid phase flywheel (13) connected by a mechanical means to a shaft (111) aligned along the rotational axis of the flywheel.

Regarding claim 2, Maxwell discloses a semi spheric structure acts as the flywheel shell and fluid container.

Regarding claim 3, Maxwell discloses a semi spheric structure made of a composite material acts as the flywheel shell and fluid container.

Regarding claim 4, Maxwell discloses a perforated radial vein cluster is bonded to the inner surface of the semi spheric structure.

Regarding claim 5, Maxwell discloses a porous matrix is placed between the internal vanes.

Art Unit: 2834

Regarding claim 6, Maxwell discloses a small viscous particles are used in place of a fluid.

Regarding claim 7-12, Maxwell discloses the liquid phase flywheel is fitted with electrically conducting elements which, in rotating through a magnetic field, result in the generation of electrical power.

Response to Arguments

3. Applicant's arguments filed paper # 6,9/9/2002 have been fully considered but they are not persuasive. Because, Maxwell reads on every feature of the claimed language and regardless how the operation of the Maxwell's apparatus does.

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2834

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
